CONTAMINATED Glove Removal

1. Pinch and pull cuff of glove. Scoop with finger.

2. Form beak, pulling glove inside out over all fingers and thumb.

3. Pinch opposite glove with beaked hand.

4. Pull glove off.

5. With ungloved hand, slide finger down inside of glove and remove glove.

6. Dispose of removed gloves into appropriate waste receptacle. IMPORTANT: If blood is visible in body fluids, gloves must be discarded into biohazard bag.

7. Wash hands with soap and running water. IMPORTANT: Do not touch your face before washing hands!
